

THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY
DEPARTMENT OF ELECTRONIC AND COMPUTER ENGINEERING
APPLICATION FOR ADMISSION TO POSTGRADUATE PROGRAMS (Fall 2027-28)

Important Note:

1. This form should be completed in **English**. Best to complete the form in Microsoft Word before printing it for signature. Alternatively, **TYPE OR PRINT** in **BLACK INK**.
2. Completed form should be combined with all supporting documents in ONE PDF file, and submit by email to ecceas@ust.hk. Please use "PhD-EAS 2027" for email subject.

Part 1. PERSONAL PARTICULARS

Full Name in English (<i>Surname/family name first, must be identical with the name printed on your identity document.</i>)		
Li Shenshi		
Full Name in Chinese	Date of Birth (<i>dd/mm/yyyy</i>)	Gender (<i>Please select</i> ☒ Male / ☐ Female)
李申适	05/01/2005	☒ Male / ☐ Female
Nationality / Citizenship	Need for a Student Visa/ Entry Permit? (<i>Please select</i> ☒ Yes / ☐ No)	
Chinese	☒ Yes / ☐ No	
Correspondence Address		
Room 611, Dormitory 25, Student Housing, Yuquan Campus, Zhejiang University, 38 Zheda Road, Hangzhou 310027, P.R.China		
Contact Information <i>Applicants from outside Hong Kong please include both country code and area code</i>		
Mobile Phone No.		Other Contact Phone No.
+86 131 9237 0957		+86 139 239 82656
E-mail Address		
3230105050@zju.edu.com		

Part 2. CHOICE OF POSTGRADUATE PROGRAM(S)

Preference	Program Code	Program Title	Level	Mode of Study
1	D242	Doctor of Philosophy (Electronic and Computer Engineering)	PhD	Full-time

Part 3. ACADEMIC RECORD

Please list a **full record of your post-secondary education**, including undergraduate and postgraduate programs **completed or not**, in reverse chronological order, feel free to append additional sheets.

	1		2		3	
Name of Institution	Zhejiang University					
Country	China					
Period of Attendance (<i>mm/yyyy</i>)	<i>From</i> 08/2023	<i>To</i> 06/2027	<i>From</i>	<i>To</i>	<i>From</i>	<i>To</i>
Mode of Study (<i>Please select</i> ☒ Full-time / ☐ Part-time)	☒ Full-time / ☐ Part-time		☐ Full-time / ☐ Part-time		☐ Full-time / ☐ Part-time	
Level of Qualification (<i>e.g. Bachelor's degree</i>)	Bachelor's degree					
Degree Major / Area of Study (<i>e.g. Biology</i>)	Opto-Electronic Information Science and Engineering					
Title of Award (<i>e.g. BSc (Hons) in Molecular Biology</i>)	BEng in Opto-Electronic Information Science and Engineering					
Honors / Award Classification (<i>e.g. Second Class Honor, if applicable</i>)	National Scholarship (Top 3%), First-Class Scholarship, Zhejiang University (Top 6%)					
Grade Point Average (<i>as shown on transcript</i>)	3.93/4.0					
In-school Ranking	18/103					
Date / Expected Date of Award (<i>mm/yyyy</i>)	06/2027					

Part 4. PROFESSIONAL QUALIFICATIONS (Please provide copy of certificate(s) as supporting document(s).)

	1	2	3
Name of Awarding Body	Educational Testing Service	Ministry of Education of the People's Republic of China	21 st Century Media and Education
Country	United States of America	People's Republic of China	People's Republic of China
Qualification / Award	Test of English as a Foreign Language (Toefl iBT)	National Scholarship for Undergraduate and College Students	Second Prize at the 29 th China Daily 21 st Century Cup National English Speaking Competition
Means of Attainment (e.g. by election or examination)	By examination	By election	By election
Date / Expected Date of Award (mm/yyyy)	01/2025	12/2024	05/2024

Part 5. WORK EXPERIENCE

	1		2		3	
	<i>From</i>	<i>To</i>	<i>From</i>	<i>To</i>	<i>From</i>	<i>To</i>
Employment Period (mm/yyyy)						
Mode	☐ Full-time / ☐ Part-time		☐ Full-time / ☐ Part-time		☐ Full-time / ☐ Part-time	
Name of Organization						
Last Position Held						
Major Responsibilities						

Part 6. INTENTION TO JOIN HKUST

Apart from HKUST, are you considering other Universities?	☒ Yes / ☐ No
If yes, which University you are considering?	Zhejiang University

Part 7. REASONS TO APPLY FOR THE PROGRAM(S) and OTHER RELEVANT INFORMATION

I first learned about the HKUST PhD-EAS program through a senior who enrolled through this pathway, whose firsthand account of the ECE department's research environment convinced me this was the right fit. Two labs in particular stand out to me. Professor Li Xiaomeng's work on medical imaging aligns well with my interest in applying optical systems to healthcare applications. Professor Chen Qifeng's research in computational photography and visual intelligence—spanning low-light imaging, image synthesis, and embodied AI—connects directly with my own background in machine vision and deep learning-based perception. Together, these two directions reflect the kind of photonics-meets-intelligence research I hope to pursue at the doctoral level.

My interest in this intersection grew out of a research project on surface defect detection for heterogeneous materials. Faced with complex surface textures that defeated rule-based methods, I introduced deep learning-based approaches that substantially improved detection accuracy and robustness. This experience solidified my belief that the next frontier in optoelectronics lies in tightly coupling optical sensing with machine vision—a direction central to both labs I hope to join.

My technical strengths center on machine vision and deep learning, complemented by hands-on experience building optical measurement systems. These skills are directly transferable to the research challenges in HKUST ECE. This fit is also what draws me to the direct-to-PhD structure: it enables early immersion in long-term, interdisciplinary work where such a foundation can be fully developed. My goal is to build optical sensing systems with real-world impact in healthcare or visual computing, and I see HKUST as the right place to pursue that.

Part 8. INTENDED AREA OF STUDY

Rank your preference by entering 1 as first priority, 2 as second priority ... etc.

4	Biomedical Engineering (BME) This area targets engineering solutions for problems in medicine and the life sciences. This research stream covers engineering principles and materials technologies applied to Medical Imaging, Biomedical Optics and Biophotonics, Neuroengineering, Medical Electronics, Bioinformatics/Computational Biology, Biosignal Processing, Biomedical Microdevices and BioMEMS.
2	Control and Robotic Systems (CRS) This area covers control and robotic systems theory, optimization theory, detection and estimation, networked sensing and control, and their applications in next-generation industry robots, multi-agent systems, manufacturing automation, aeronautical and aerospace systems, autonomous vehicles, energy systems, intelligent transportation, medical and healthcare systems.
3	Data Science and AI (DSAI) This area is devoted to the development of theory and algorithms in a variety of domains such as Big Data Analytics, Artificial Intelligence, Speech and Language Processing, Financial Analytics, Computational Biology, Bioinformatics, Neural Engineering, Deep Learning, and Signal Processing.
7	Integrated Circuits and Systems (ICS) Topics related to Digital, Analog and Mixed-Signal Integrated Circuits (IC) Design, VLSI Design, Embedded Systems, Network-on-Chip and Multiprocessor System-on-Chip, Circuit and System Simulation and Verification Tools. Advanced topics include RF and mm-Wave IC and Systems, Data Converters, Power Management IC, High-Speed Optical Communication Transceiver, Image and Bio-Medical Sensors, Signal Processing and System Architectures, Design Automation, Computer Architecture, Reconfigurable System and Hardware/Software Codesign.
8	Microelectronics (mE) This area is devoted to the development of principles, material and device technologies applied to manipulating charges in micro-/nano-structures including Micro-/Nano-electronics, Semiconductor/Novel Materials and Devices, Nanofabrication Technology, Microelectromechanical Systems, Microsystem Integration, and Flexible Electronics.
5	Photonics (Ph) This area is devoted to the development of principles, material and device technologies applied to generating, manipulating and detecting light (photons) for applications including Displays, Optoelectronics, Lasers, Nonlinear Photonics, Nanophotonics, Biophotonics, Silicon Photonics, and Electronic-Photonic Integration.
9	Quantum Engineering (QE) This area is devoted to the development of principles, theories and algorithms, material and device technologies applied to manipulating quantum systems and quantum information for emerging applications including Quantum Materials, Quantum Devices, Quantum Control, Quantum Sensing and Metrology, Quantum Photonics, and Quantum Simulators.
6	Wireless Communications and Networking (WCN) This area includes emerging Wireless Communications, IoT Systems, 6G, Machine Learning, Ambient RF Systems, Edge Computing and Communications, Computer Networking, Visible Light Communications, Coding and Information theory.
1	Others (please specify): <u>Computational Photography, Computer Vision and Intelligent Imaging Systems</u>

Part 9. INTENDED SUPERVISOR(S):

Please put names of your intended supervisor in priority, with (1) as the most intended supervisor.

Our faculty list can be found [here](#).

	Name
1.	Shaojie Shen
2.	Weichuan Yu
3.	Xiaomeng Li

Part 10. REFEREES (Each applicant **MUST** seek two referees to support the application.)

	Name	Position	Name of Organization	Contact Tel. No.	Email Address
4.	Kaiwei Wang	Professor	College of Optical Science & Engineering, Zhejiang University	+86-571-87953154	wangkaiwei@zju.edu.cn
5.	Yaocheng Shi	Professor, Associate Dean	College of Optical Science & Engineering, Zhejiang University	+86-571-88206513	yaocheng@zju.edu.cn

Part 11. DECLARATION

1. I declare that the information given in support of this application is accurate and complete. I understand that this information will be used in the admission decision process and that any misrepresentation will disqualify my application for admission and enrollment in HKUST.
2. I authorize HKUST to obtain any and all information about my candidature for my studies in institutions in Hong Kong and elsewhere.
3. I authorize HKUST to use my data as a basis of all types of processing relevant to admission in 2026/27 to postgraduate programs offered by HKUST and for all other associated purposes, including identifying multiple applications, and checking records of studies as a student in other institutions.
4. I understand that, upon my registration in a program, this data will become a part of my student record. That student record may be used for a number of academic and administrative purposes consistent with the mission of the university, including academic advising, program planning and evaluation, checks for concurrent registration at other local government-funded institutions, etc.

Applicant's Signature: _____

 Shenshi Li

Date : 15/03/2026

CONFIDENTIAL

THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY Postgraduate Studies Reference Form (1)

Part 1: To be completed by Referee		Part 2: To be completed by Applicant	
Name:	Kaiwei Wang	Name of Applicant:	Shenshi Li
Work Position:	Professor & PhD Supervisor	Name of Institution:	Zhejiang University
Name of Organization and Address:	College of Optical Science & Engineering, Zhejiang University 38# Zheda Road, Hangzhou P.R.China, 310027	HKUST Program(s) Applied for:	<u>Doctor of Philosophy</u> <u>(Electronic and Computer Engineering)</u>
Contact Phone No.:	+86-571-87953154	Note to Applicant: Please send this form directly to your referee requesting him/her to complete and return it by email to ceecas@ust.hk at the earliest convenience after submission of your application.	
E-mail Address:	wangkaiwei@zju.edu.cn		
Please note below my comments on the applicant's personal and general abilities from my knowledge of the applicant.			

1. How long and under what circumstances have you known the applicant?

I have known the applicant for two years, first as the instructor for the undergraduate elective "Machine Vision and Image Processing," and subsequently as the supervisor for his University-level Student Research Training Program (SRTP).

2. In which category would you place the applicant in relation to the abilities of postgraduate students of your experience?

(Tick ☒ as appropriate)	outstanding (top 5%)	excellent (top 15%)	very good (top 25%)	good (top 40%)	average	below average	unable to assess
Intellectual and analytical abilities	☒	☐	☐	☐	☐	☐	☐
Communication skills	☒	☐	☐	☐	☐	☐	☐
Diligence	☒	☐	☐	☐	☐	☐	☐
Capacity to work independently	☒	☐	☐	☐	☐	☐	☐
Capacity for original thought	☒	☐	☐	☐	☐	☐	☐
Capacity for organization	☒	☐	☐	☐	☐	☐	☐
Emotional maturity and stability	☒	☐	☐	☐	☐	☐	☐
Motivation to pursue advanced studies	☒	☐	☐	☐	☐	☐	☐

3. What is your assessment of the applicant's intellectual ability? (It would be helpful if, in the case of an applicant who has already graduated, you could indicate whether you consider the class of degree achieved fairly represented his/her academic caliber. If the applicant has not yet graduated, we should be grateful for a realistic assessment of his/her degree prospects.)

The applicant is among the stronger students I have taught at the undergraduate level. He grasps new concepts quickly, asks considered questions, and shows a consistent interest in understanding problems from first principles rather than applying ready-made solutions.

4. What is your opinion of the applicant's motivation towards and suitability for a career in the chosen field(s) of study? What do you consider to be his / her principal qualities and weaknesses in this respect?

The applicant is genuinely motivated and has shown real commitment to the field over the period I have known him. He works independently, organises his time well, and takes responsibility for outcomes. I am satisfied that he has both the ability and the drive to succeed in postgraduate study.

Further Comments: You are invited to amplify any of your judgments in question 2 or to make any further comments which you consider might be relevant either in the following space or in a separate letter.

In my course on machine vision and image processing, Shenshi chose to tackle his final project using classical computer vision methods at a time when every other student in the class used deep learning. The decision was deliberate — he wanted to develop a thorough understanding of the underlying techniques rather than rely on existing frameworks. The result was the highest presentation score in the cohort.

As team leader of the SRTP under my supervision, Shenshi managed planning, task allocation, and experimental progress across a small group. The project was completed on schedule and to a good standard. This gave me confidence that he can handle the practical demands of a research environment, not just the intellectual ones.

On balance, I consider the applicant a capable and self-motivated candidate, and I support his application.

- I understand that :
- This is an academic reference report in support of the applicants named on the right who is seeking admission to HKUST as a postgraduate student in 2026/27, and
 - Under the provision of the Personal Data (Privacy) Ordinance, information contained in this report will be shown to the applicant upon request.

Signature: _____ Date: _____

CONFIDENTIAL

THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY Postgraduate Studies Reference Form (2)

Part 1: To be completed by Referee		Part 2: To be completed by Applicant	
Name:	Yaocheng Shi	Name of Applicant:	Shenshi Li
Work Position:	Professor & Associate Dean	Name of Institution:	Zhejiang University
Name of Organization and Address:	College of Optical Science & Engineering, Zhejiang University 38# Zheda Road, Hangzhou P.R.China, 310027	HKUST Program(s) Applied for:	<u>Doctor of Philosophy</u> <u>(Electronic and Computer Engineering)</u>
Contact Phone No.:	+86-571-88206513	Note to Applicant: Please send this form directly to your referee requesting him/her to complete and return it by email to ecceas@ust.hk at the earliest convenience after submission of your application.	
E-mail Address:	yaocheng@zju.edu.cn		
Please note below my comments on the applicant's personal and general abilities from my knowledge of the applicant.			

5. How long and under what circumstances have you known the applicant?

My contact with the applicant goes back roughly a year. He joined a competition project I am supervising on 6G MIMO technology, and we also interact through the Class of 2025 Innovation Programme, where we both serve as mentors.

6. In which category would you place the applicant in relation to the abilities of postgraduate students of your experience?

(Tick ☒ as appropriate)	outstanding (top 5%)	excellent (top 15%)	very good (top 25%)	good (top 40%)	average	below average	unable to assess
Intellectual and analytical abilities	☒	☐	☐	☐	☐	☐	☐
Communication skills	☒	☐	☐	☐	☐	☐	☐
Diligence	☒	☐	☐	☐	☐	☐	☐
Capacity to work independently	☒	☐	☐	☐	☐	☐	☐
Capacity for original thought	☐	☒	☐	☐	☐	☐	☐
Capacity for organization	☒	☐	☐	☐	☐	☐	☐
Emotional maturity and stability	☒	☐	☐	☐	☐	☐	☐
Motivation to pursue advanced studies	☒	☐	☐	☐	☐	☐	☐

7. What is your assessment of the applicant's intellectual ability? (It would be helpful if, in the case of an applicant who has already graduated, you could indicate whether you consider the class of degree achieved fairly represented his/her academic caliber. If the applicant has not yet graduated, we should be grateful for a realistic assessment of his/her degree prospects.)

From what I have seen in our competition project, the applicant is able to get to grips with unfamiliar technical material fairly quickly and is methodical in how he works through problems. He handled the planning and feasibility work for the project without needing close guidance, which is not always the case with undergraduates at this stage.

8. What is your opinion of the applicant's motivation towards and suitability for a career in the chosen field(s) of study? What do you consider to be his / her principal qualities and weaknesses in this respect?

He takes his work seriously and thinks about it beyond the immediate task. In a college planning forum I chaired, where he spoke as a student representative, he raised issues around research training and course design that were specific and well-considered. That kind of engagement tends to reflect something genuine about a person's attitude. Overall, I think he is ready for the demands of postgraduate study and would do well.

Further Comments: You are invited to amplify any of your judgments in question 2 or to make any further comments which you consider might be relevant either in the following space or in a separate letter.

A note on his work with junior students: within the Innovation Programme, he has on several occasions taken the initiative to talk through coursework and research questions with students in younger cohorts. Nobody asked him to do this. The responses from those students have been good, and it is indicative of his broader character.

I would also mention that his contributions in the curriculum planning meeting went beyond what one typically hears from student representatives. He identified specific problems — repetition across courses, limited room for independent inquiry — and suggested concrete ways to address them. As someone responsible for academic planning in the school, I found his input directly useful.

He is a capable student with a sensible head. I am glad to support his application.

Personal Statement

As an Optoelectronic Information Science and Engineering student at Zhejiang University, my academic journey has been driven by a desire to understand how precise physical sensing can be integrated with intelligent algorithmic inference. While my early studies focused on optical system design, my research has increasingly centered on the challenge of extracting accurate system states from complex, multi-modal information. This evolution—from component-level design to system-level perception—motivates my application for the PhD program at HKUST. I seek to deepen my expertise in multi-modal sensing and state estimation, contributing to real-world systems where robustness and precision are paramount.

My engagement with this question evolved through interconnected projects at Zhejiang University, each revealing a new layer of the sensing puzzle. My early immersion in optical engineering—designing smartphone lenses in SOLIDWORKS and optimizing systems in ZEMAX—taught me that sensing fidelity begins with rigorous design. When I led the LEGO-based fluorescence microscope project with Prof. Yubing Han, I translated optical theory into working hardware, embodying what I call "constrained innovation": delivering functional perception systems under real-world constraints of cost, accessibility, and simplicity. This project sparked deeper questions about democratizing precision measurement while maintaining scientific rigor.

The turning point came when I led a university-level research project on defect detection in heterogeneous materials using depth-from-focus reconstruction augmented with deep learning. Here I learned that optical sensing is merely information acquisition—true perception requires intelligent fusion. I trained models to extract material defects from multi-slice depth sequences, discovering that effective state estimation hinges on combining physical imaging principles with computational inference. Most recently, I led a competition-winning project addressing nondestructive metrology for high-aspect-ratio micro-holes. Rather than accept off-the-shelf tools, I architected an end-to-end system: confocal microscopy for optical acquisition, OpenCV pipelines for automated feature extraction, and probabilistic validation. This crystallized an insight: precise state estimation demands tight coupling between sensing hardware, image processing algorithms, and systematic validation.

These projects have equipped me with both technical depth and philosophical clarity. My coursework in Silicon Photonics, Electromagnetic Fields and Waves, and Machine Vision & Image Processing provides theoretical grounding. I am proficient in MATLAB, Python, and C++, expert in optical design software, and increasingly skilled in deep learning. My academic recognition—National Scholarship, First-Class Scholarship, and top ranking in my cohort—reflects my commitment to excellence, yet I value most the intellectual growth from leading research teams and learning to communicate complex ideas with clarity.

At HKUST, I envision research at the intersection of multi-modal state estimation, sensor-algorithm co-design, and adaptive perception under uncertainty. These questions align naturally with HKUST ECE's strengths in signal processing, robotics, and computer vision. I am drawn to problems where optical, inertial, and computational modalities must be fused intelligently, and where sensing hardware and inference algorithms must be optimized jointly. HKUST's early admission scheme particularly appeals to me because it enables substantive research conversations with potential advisors before enrollment. My demonstrated capability for independent project leadership, combined with an evolving but coherent research direction, positions me to contribute meaningfully from Day One. The trajectory from smartphone lens design to deep learning-augmented measurement to multi-modal state estimation represents not disconnected projects, but a coherent intellectual journey toward understanding how intelligent sensing enables complex systems to operate reliably in the real world.

Three grade systems are used simultaneously in Zhejiang University, specifically as follows (*Cr=Credits; *Sc=Score):
1. The percentage system: Above 60 is passing, 100 is full mark.
2. Five degree grading: Excellent(A), Good(B), Fair(C), Passing(D), Failed(F).
3. Two degree grading: Passing(P), Failed(F).
4. Courses marked with * are courses transferred from other universities and their original records are kept.
5. Courses marked with "△" are repeat courses, and GPA is calculated on the highest grade.
6. Courses marked with "O" are not included in the GPA calculation.

RECOGNITION INSTRUCTION: 1. "ZHEJIANG UNIVERSITY" is imprinted on the lower right corner as a line, they can be seen under the magnifying glass.

2. The fluorescent school badge of ZHEJIANG University on the higher left corner will appear under the UV light. 3. The words "ZJU" on the center of the report will turn purple under the sunlight. 4. This style transcript has been formally in use since September 1, 1999.

Studying Certificate of Zhejiang University

This is to certify that Mr.LI Shenshi, born on January 05, 2005, is studying in the College of Optical Science and Engineering, Zhejiang University with a specialty of Opto-Electronics Information Science and Engineering now. He will be granted graduation and be awarded the Bachelor's Degree in Engineering in June 2027.
